# Candidacy for Second Vice-President of CIML

Bill Loizides

General Manager, Legal Metrology

Australia

22 October 2019

# Bill Loizides

- General Manager, Legal Metrology, NMIA.
- One of only a few national metrology authorities with a 'line of sight' from the primary standards and the development of OIML Recommendations to their implementation and enforcement within the community affecting Manufacturers, Traders and public.
- Responsible for all legal metrology operations in Australia.
- Experience in legal metrology, strategic policy development at the Economy level, enforcement and compliance, health and safety, communications and change management.

TC 12/P1 meeting (electricity meters), May 2019, Helsinki.

A Trade Measurement Inspector testing a fuel dispenser

# OIML Contributions

- CIML Member for Australia since 2016
- Presidential Council Member from 2017
- Deputy Chair, OIML-CS Management Committee
- Chair of the Maintenance Group OIML-CS
- CEEMS Advisory Group Member
- Task Group 2023 Member
- Direct and coordinate Australia's participation within OIML (TC Committee participation).

# Support for the President and OIML

- If elected I look forward to supporting the vision and work of the CIML President, 1<sup>st</sup> Vice-President, Presidential Council, CIML, BIML and OIML.
- We must continue to streamline our **technical work** while retaining confidence and integrity in our documentation and systems.
- I will continue to serve the **OIML-CS**; exploring ways it can be improved and provide benefits to OIML members and manufacturers.
- I remain a strong advocate for **CEEMS** support and activities, and exploring new and innovative ways of building expertise and capacity across OIML.
- I look forward to building closer collaborations with BIPM, ISO, IEC, ILAC, IAF and other quality infrastructure partners.

# The Way Forward

- OIML must become more innovative, dynamic and responsive to stakeholder needs and emerging issues.
- Legal metrology must leverage the 4<sup>th</sup> industrial revolution, not simply keep up. There will be increased opportunities for regional and international cooperation at an operational level. We must explore OIML's role in this space!
- Continue to drive the evolution of the OIML-CS to incorporate a robust and meaningful CTT process at a regional or international level. Reducing barriers to trade and costs to instrument manufacturers, users *and* national authorities.
- Invest in and empower all OIML Members –
  - increase practical support for CEEMS;
  - online/virtual training;
  - secondments and exchanges;
  - partnership opportunities; and
  - regional compliance programs.

# Thank you for your support
